NGUYEN DUY KIEN

Software Engineer

Dob: 03/07/2005

Phone: 0961418036

Email: kienduy1221@gmail.com

Website: github.com/kienduy05

Address: Xuan Dinh, Ha Noi

OBJECTIVE

Software Engineer with a strong logical foundation and the ability to quickly adapt to new technologies. Possess practical experience in building software systems, optimizing performance, and implementing modern development workflows through personal projects. Seeking an internship opportunity to contribute value by solving real-world technical challenges while continuously learning and enhancing professional skills in a professional environment

EDUCATION

2023 - Present

University of Transport and Communications (UTC)
Bachelor of Engineering in Information Technology
GPA : 3.51/4.0

EXPERIENCE

5/2026 - now

HOMEOS VIET NAM TECHNOLOGY JOINT STOCK COMPANY

Project: Susu Shop E-commercial website

Description: Developed and deployed SusuShop, an E-commerce platform for mother and baby products, including a responsive web application and Zalo Mini App. The project focuses on delivering a seamless shopping experience, product management, voucher integration, and customer engagement across multiple platforms.

Technologies: ReactJS, Node.js, SQL Server, Zalo Mini App, Github

Responsibilities:

• Developed responsive and mobile-first user interfaces using ReactJS, ensuring consistent user experience across web and Zalo Mini App platforms.

• Implemented product catalog, product detail, shopping cart, and checkout workflows for online purchasing.

• Integrated JWT-based authentication and authorization mechanisms to secure user sessions and API access.

• Developed and maintained RESTful API integrations between frontend applications and backend services.

• Implemented voucher and promotion features, improving purchase incentives and user engagement.

• Collaborated with team members using Git for source code management, code reviews, and feature development.

• Participated in testing, debugging, and performance optimization to enhance application stability and responsiveness.

• Successfully deployed the frontend application and supported the release process for the Zalo Mini App platform.

-

Project: Petrolimex Nghe An – HRM & Payroll Management System

Description: Developed an internal enterprise management system for Petrolimex Nghe An, including HRM, payroll, tax calculation, sales evaluation, bonus distribution, training, medical records, accounting

reports, business reports, and management dashboards. The system helps centralize business data, automate internal workflows, and support management decision-making.

Technologies: HTML, CSS, VanillaJS, JavaScript Backend, REST API, SQL Server

Responsilities:

• Developed user interfaces for multiple internal modules using VanillaJS, including HRM, payroll, personal income tax, sales evaluation, bonus distribution, training management, and reporting dashboards.

• Built UI pages and backend APIs for HRM, payroll, personal income tax, sales evaluation, bonus distribution, training, and reporting modules.

• Implemented CRUD operations, dynamic tables, filtering, searching, pagination, and form validation.

• Handled business logic related to employee records, salary calculation, tax calculation, bonus distribution, and management reports.

• Improved UI/UX consistency across modules and supported bug fixing, testing, and data validation during development.

PROJECTS

3/2026 - 4/2026

Fullstack Developer – Book Management System

🔗 **https://github.com/kienduy05/Web_API2**

Description

Technologies: ASP.NET Core, Python Flask, SQL Server, RESTful API, GitHub

Responsibilities:

• Collaborated with a team of 3 members using GitHub for source code management and feature integration.

• Designed and developed RESTful APIs following an API-first approach to support book management operations.

• Built backend services with ASP.NET Core and Python Flask to handle business logic and data processing workflows.

• Designed an optimized relational database schema to improve query performance and support future scalability.

• Implemented input validation and centralized error handling to improve system reliability and stability.

• Structured a clear client-server architecture to improve maintainability and support future feature expansion.

• Documented API endpoints and system architecture to simplify future development and integration.

SKILLS

Languages:	C#, C/C++ Java, JavaScript, Python
Frontend:	HTML, CSS, JavaScript , ReactJS
Backend:	ASP.NET Core, RESTful API, NodeJS , MVC Architecture, Client-Server Architecture.
Database:	SQL Server, MySQL
Tools:	Git, Github, Postman, VS Code
Languages:	Vietnamese (Native), English (Intermediate)
Soft Skills:	Logical Thinking, Problem Solving, Self-learning, Teamwork, Communication
